The Foreign Investment Law of the PRC (《中華人民共和國外商投資法》) (the "Foreign Investment Law")

On 15 March 2019, the Standing Committee of the National People's Congress promulgated the Foreign Investment Law which became effective on 1 January 2020. The Implementation Rules of the Foreign Investment Law came into effect on the same date as well. The Foreign Investment Law and its implementation rules define foreign investment as direct or indirect investment activities in the PRC by one or more foreign natural persons, enterprises or other organizations ("**Foreign Investors**"), and clearly stipulates four types of investment activities would fall within the definition of foreign investment, including (a) Foreign Investors alone or cooperate with other investors to establish foreign-invested enterprises in the PRC; (b) Foreign Investors acquire shares, equities, property shares or other similar rights of Chinese domestic enterprises; (c) Foreign Investors alone or cooperate with other investors to invest in new projects in the PRC; and (d) other means of investment prescribed by laws, administrative regulations and rules promulgated by the State Council. Furthermore, the law prescribes that the PRC applies the pre-establishment national treatment and negative list management system against foreign investment. The negative list of prohibited investment sectors prescribes areas which foreign investors are not allowed to invest upon; the negative list of restricted investment sectors prescribes areas which foreign investors are required to abide to the conditions as imposed under the regulations of the negative list; and all other areas excluded from the negative list would be handled according to the general principles applicable for both domestic and foreign enterprises. The Foreign Investment Law further stipulates that laws such as the Company Law of the PRC and the Partnership Enterprise law of the PRC shall apply to the organizational form, corporate governance and activities standards of foreign invested enterprises. For foreign invested enterprises established before the implementation of the Foreign Investment Law may maintain their original organizational form for five years from 1 January 2020. Specific measures for implementation shall be formulated by the State Council. The Foreign Investment Law does not explicitly include clauses involving "actual control" or "contractual arrangements."

Nevertheless, the Company does not rule out the possibility that there will be further laws and regulations governing the same. Therefore, it remains uncertain as to whether the structure under contractual arrangements will be included in the supervisory regime for foreign investment, and if so, the ways under which it is governed. As at the date of this interim report, the Company's operation remained unaffected by the Foreign Investment Law. The Company will closely monitor the development of the Foreign Investment Law and related legislations.

Information about the Group's performance obligations is summarised below:

Goods transferred at a point in time

The performance obligation is satisfied upon acceptance by the customers and payment in advance is normally required, except for customers with credit terms, where payment is generally due within 30 to 60 days from the acceptance by the customers.

Services transferred over time

Other than the services for students with option to choose their meals from the canteen menus and make payments using their prepaid on-school identity cards, where goods are transferred at a point in time, the performance obligations for services are satisfied over time. This is because a customer simultaneously receives and consumes the benefits provided by the Group.

The amounts of transaction prices allocated to the remaining performance obligations are part of the contracts that has an original expected duration of one year or less. Thus, management applied the practical expedient under IFRS 15 and did not disclose the aggregate amount of the transaction prices allocated to the performance obligations that are unsatisfied or partially satisfied.

In accordance with the Group's accounting policies, each asset or CGU is evaluated annually at the end of the reporting period to determine whether there are any indicators of impairment or that previously recognised impairment losses no longer exist or have decreased. During the Period, the Group has obtained operating licenses on art training for certain tuition schools, which favourably improved the estimated service potential of the respective property, plant and equipment and right-of-use assets occupied by the Affected Business, management identified indicators that previously recognised impairment losses have decreased as at 28 February 2026.

In assessing whether there is an impairment or reversal of impairment, the carrying value of each of the CGUs is compared with its recoverable amount. The recoverable amount is the higher of the CGU's fair value less costs of disposal and value-in-use ("VIU"). For the purpose of the impairment assessment, property, plant and equipment and right-of-use assets occupied by the Affected Business and showing indications of reversal of impairment are treated as separate CGUs which represented three separate CGUs. The Group performed impairment assessments with reference to valuation performed by an independent qualified professional valuer engaged by the Group on such assets based on VIU calculations using cash flow projections based on financial budgets approved by senior management. The pre-tax discount rates applied in the cash flow projections for CGU 1 and CGU2 were 17.0% and 17.4%, respectively.
